## Summer Reading Kicks Off June 26

South Huntington patrons aged 2 and up are invited to participate in the library's annual Summer Reading Challenge. Read or listen to books and earn prizes! See inside for details.

## Appreciation for Our Library Volunteers

Library trustees and staff extend their heartfelt appreciation to Kathleen Williams Ging, Jo-Ann Malchiodi and Regina Zorn for their efforts in delivering library materials to homebound patrons, providing a library lifeline to those who might otherwise be somewhat isolated — particularly during the pandemic.

Every week, the volunteers drop off new items to sick or disabled patrons in the community and pick up materials to be returned.

The library's Homebound Service is available to those who are unable to get to the library because of illness, injury or disability. To arrange for the service, please call Martha Kahn at 631.549.4411, x255. Eligible patrons can request specific items, or they can make Martha aware of their preferences and she will choose items for them.

## Astronomy Lecture: A Sunrise Scimitar

Mon., June 7 at 3 p.m.

Early risers in the Northeast U.S. on Thursday morning, June 10th, will – weather conditions permitting – be treated to the most unusual sunrise of their lives, for they will not see a yellow-orange circle of light, but a large solar eclipse that will transform the Sun into a fiery scimitar!

Such a circumstance is very rare, having occurred only twice in the past 150 years. Eclipses of the Sun and Moon are dramatic natural events which have been described in records going back for centuries in many civilizations. Join meteorologist Joe Rao live on Zoom to examine the mechanics of what causes eclipses as well as look at events coming our way in the future, including the total solar eclipse that will be visible from upstate New York and New England on April 8, 2024. Bring your questions! Register for Zoom link beginning **May 28**.

## Alfred Van Loen Gallery

### Embracing Color: Paintings by Stan Brodsky, Ellen Hallie Schiff & Ty Stroudsburg. June 19-September 7.

This group exhibit is sure to awaken all your senses! These artists experience and record the depths and nuances of color. This exhibit demonstrates how painting can retain an urgency for artists who want to see anew.

In 2019, the art world lost Stan Brodsky, an abstract expressionist painter and extraordinary teacher, at age 94. He was also a former curator of the library's art gallery. His expressive paintings are rich with intense color that evoke and resonate memories and emotions. His paintings can be found in many museums and prestigious collections.

Ellen Hallie Schiff is energized by color and the sense of discovery of how colors meet and interact. Whether making skinny scraping marks with the tip of the palette knife or sensuous thick pigment-filled marks, she loves using her whole arm, conveying emotion through physicality as part of her process.

Grounded in the physical landscape, artist Ty Stroudsburg moves back and forth from abstraction to representational, then combines both elements to create her own language. She may drive around looking for inspiration, pulling color from scenes, noting the colors and forms that will find their way into her paintings.

Fleeing her munitions making husband prior to the outbreak of WWII, Lamarr came to the United States and took Hollywood by storm, appearing in some of the most celebrated movies in the golden age of cinema. What makes her even more remarkable was that she was also an inventor. At the beginning of World War II, Lamarr developed a radio guidance system using frequency hopping technology for torpedoes launched by the allied armies, intended to defeat the threat of jamming by the Axis. Journey with presenter Keith Crocker as we pay tribute to this remarkable lady and give her all the
