Author Visit: Thicker Than Water, The Quest for Solutions to the Plastic Crisis – Mon., Aug. 1 at 7 p.m.

Journalist Erica Cirino, author of *Thicker Than Water: The Quest for Solutions to the Plastic Crisis*, will be here to discuss the crisis of plastic pollution.

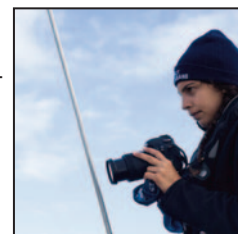

Much of what you've heard about plastic pollution may be wrong. Instead of a great island of trash, the infamous Great Pacific Garbage Patch is made up of man-made debris spread over hundreds of miles of sea; recycling is more complicated than we were taught; and

plastic pollution isn't confined to the open ocean -- it's in much of the air we breathe and the food we eat.

Detailing experiences from the deck of a plastic-hunting sailboat with a disabled engine, to the labs doing cutting-edge research on microplastics and the chemicals we ingest, Cirino will paint a picture of how plastic pollution is threatening wildlife and human health. She will also help us learn how to make personal and societal shifts

that address the causes of the plastic pollution crisis to make a better world for everyone.

Erica Cirino is communications manager of the Plastic Pollution Coalition. She has spent the last decade working as a science writer, author, and artist. Books will be available for purchase and signing. All welcome!

Immigration in New York State: 1650-1950

A traveling exhibit in our lobby July 1-15 focuses on historic immigration to New York State, from the arrival of Dutch settlers through the end of the World Wars.

Immigrants built a vibrant, diverse and modern New York State. However, the arrival of European immigrants was also disruptive, as indigenous people were pushed off of their lands.

The exhibit was compiled by the Empire State Library Network and lent by the Long Island Library Resources Council.

The library will be closed on summer Sundays and on Mon., July 4.

Alfred Van Loen Gallery

"Worlds," paintings by Carole Gutierrez. July 9-Aug. 30

Carole Gutierrez, a native of Switzerland, has been painting circles and mandalas for many years. This exhibit consists mostly of watercolors on paper and some canvas paintings, which are layered and richly colored. "I love the moment where potential energy is shifting into kinetic energy, like when a pendulum has reached its height and is about to swing back," she says. "Color is my passion. I'm interested in the balance and tension between cold and warm colors. My goal is to find the point where the tension within a painting holds the balance with its overall harmony."

The exhibit may be viewed during regular library hours. Look for a virtual tour on our website: www.shpl.info>Using the Library>Van Loen Gallery.
